backlogs help

1.		Size 5	
2.		Size 8	current iteration
3.		Size 1	
4.		Size 3	
5.		Size 13	
6.		Size 13	
7.		Size 21	
8.		Size 8	
9.		Size 13	out of scope

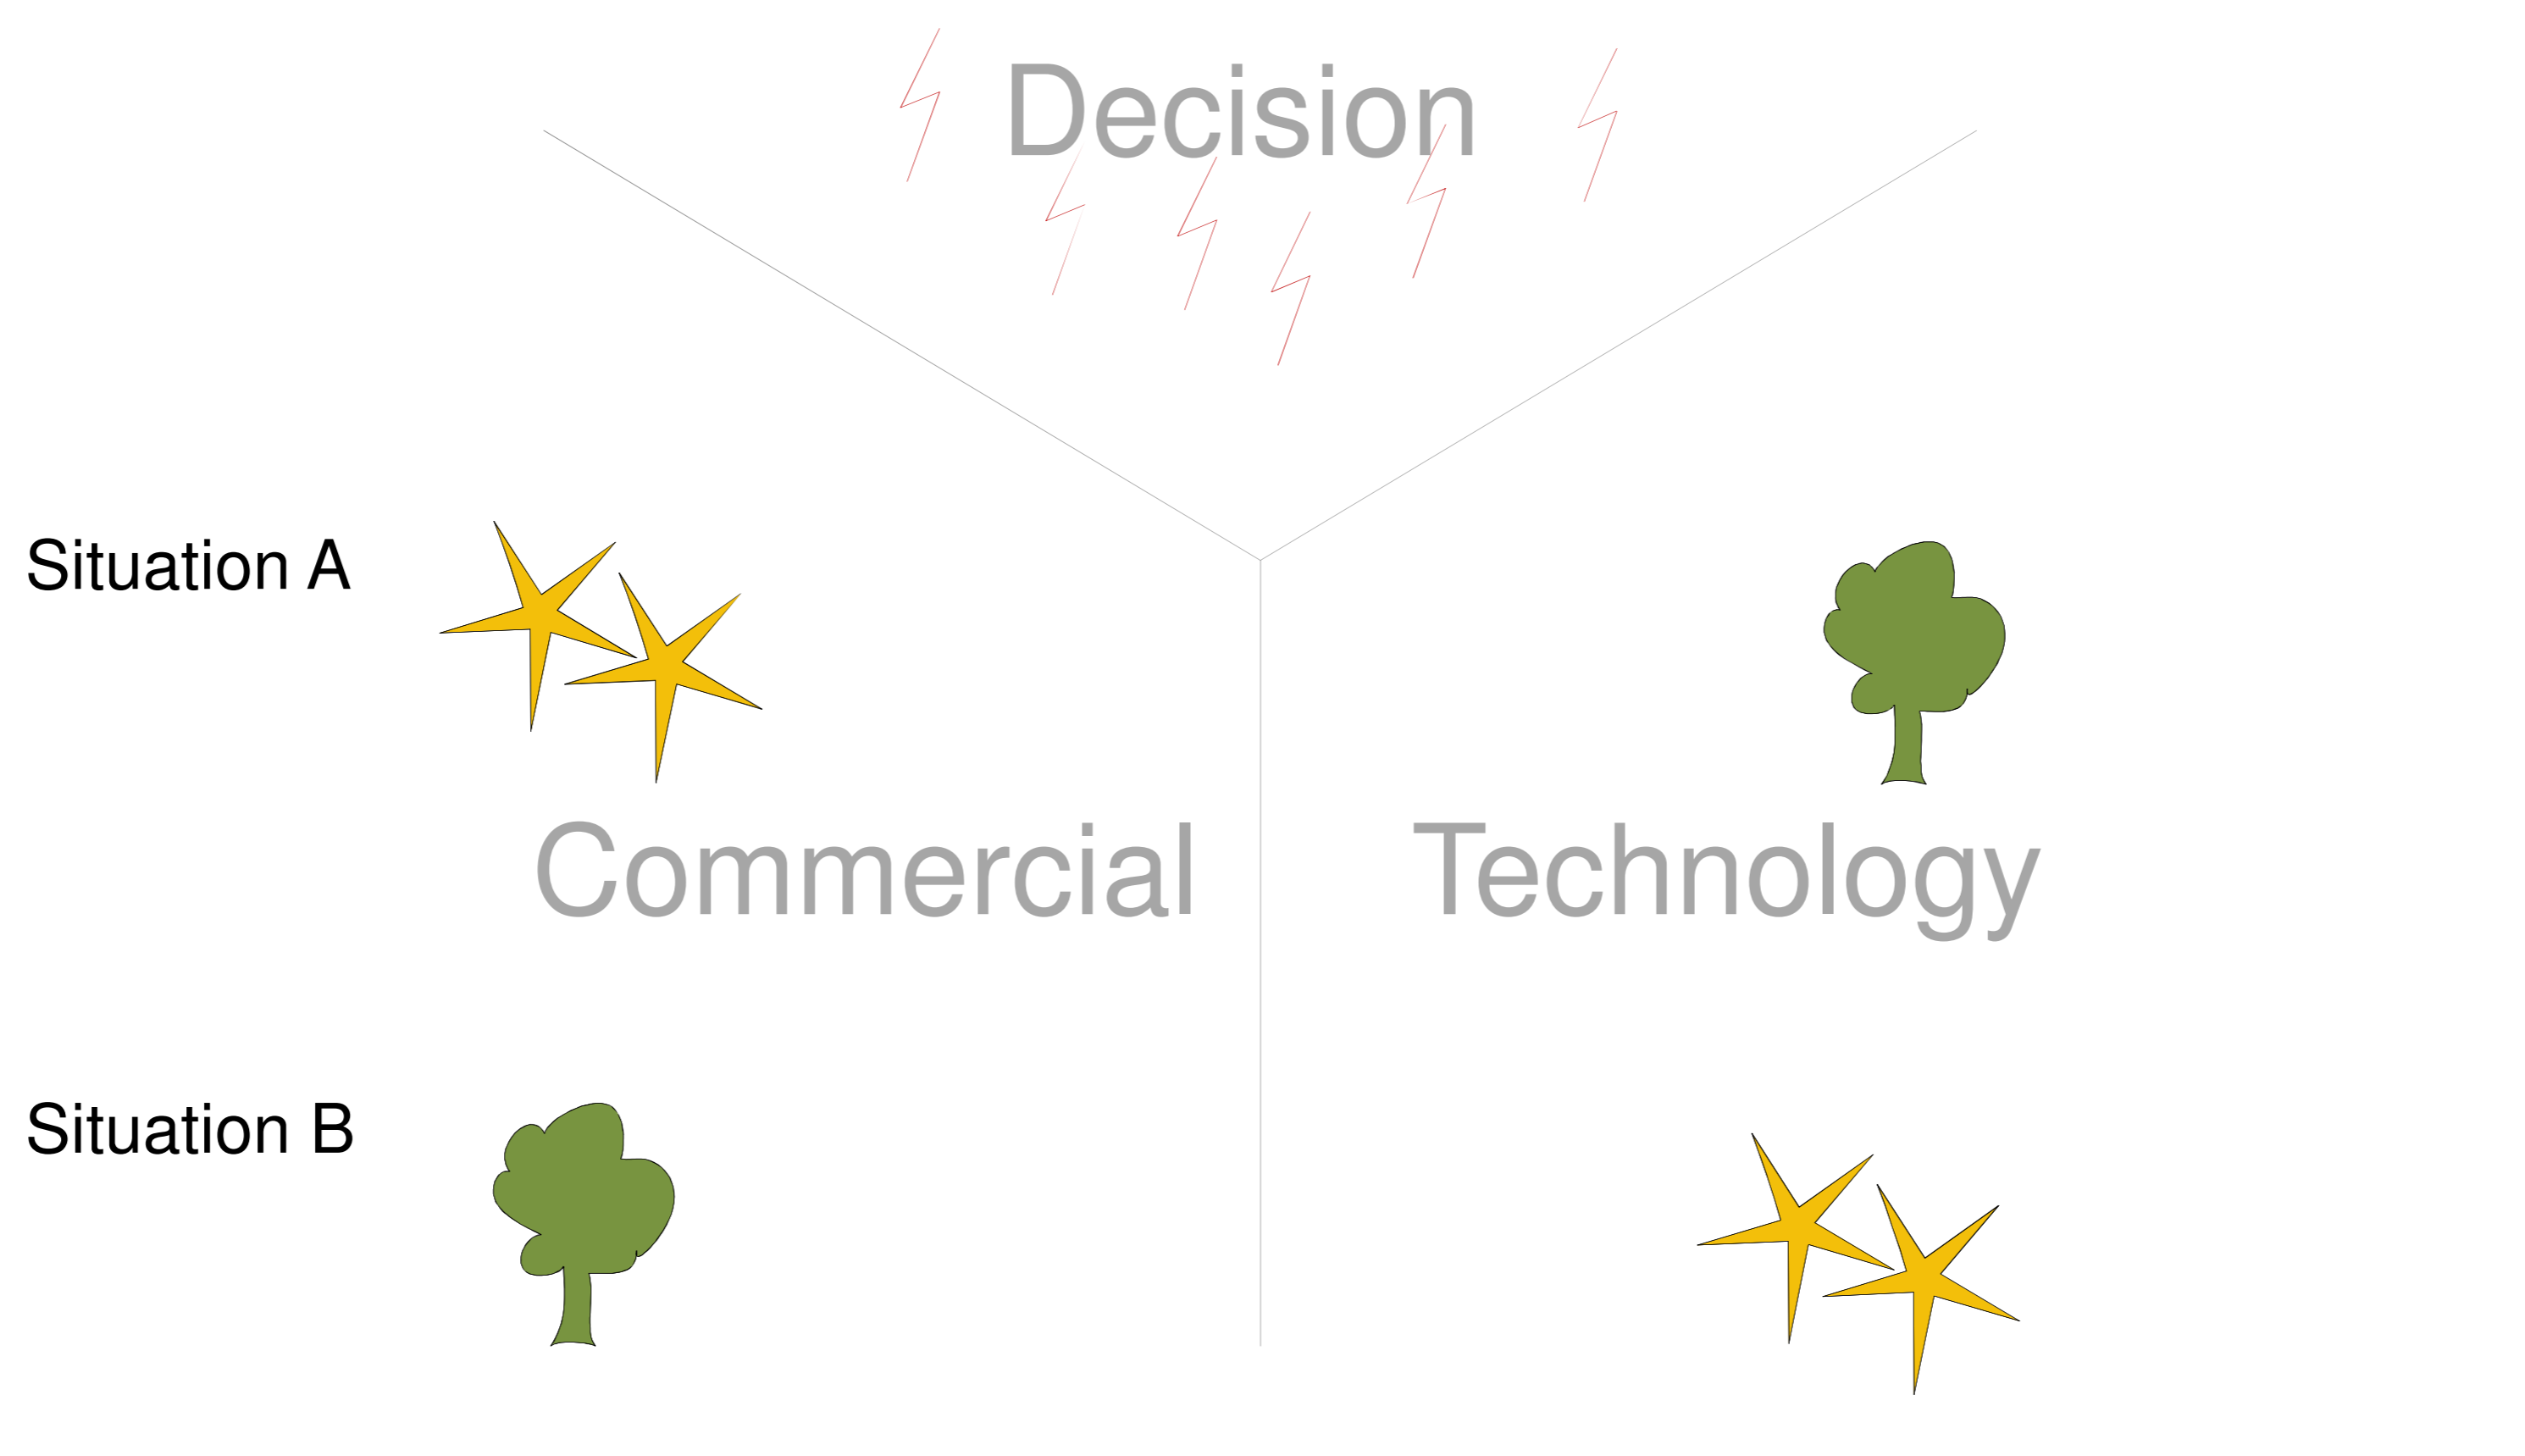

Hot spots sprint planning

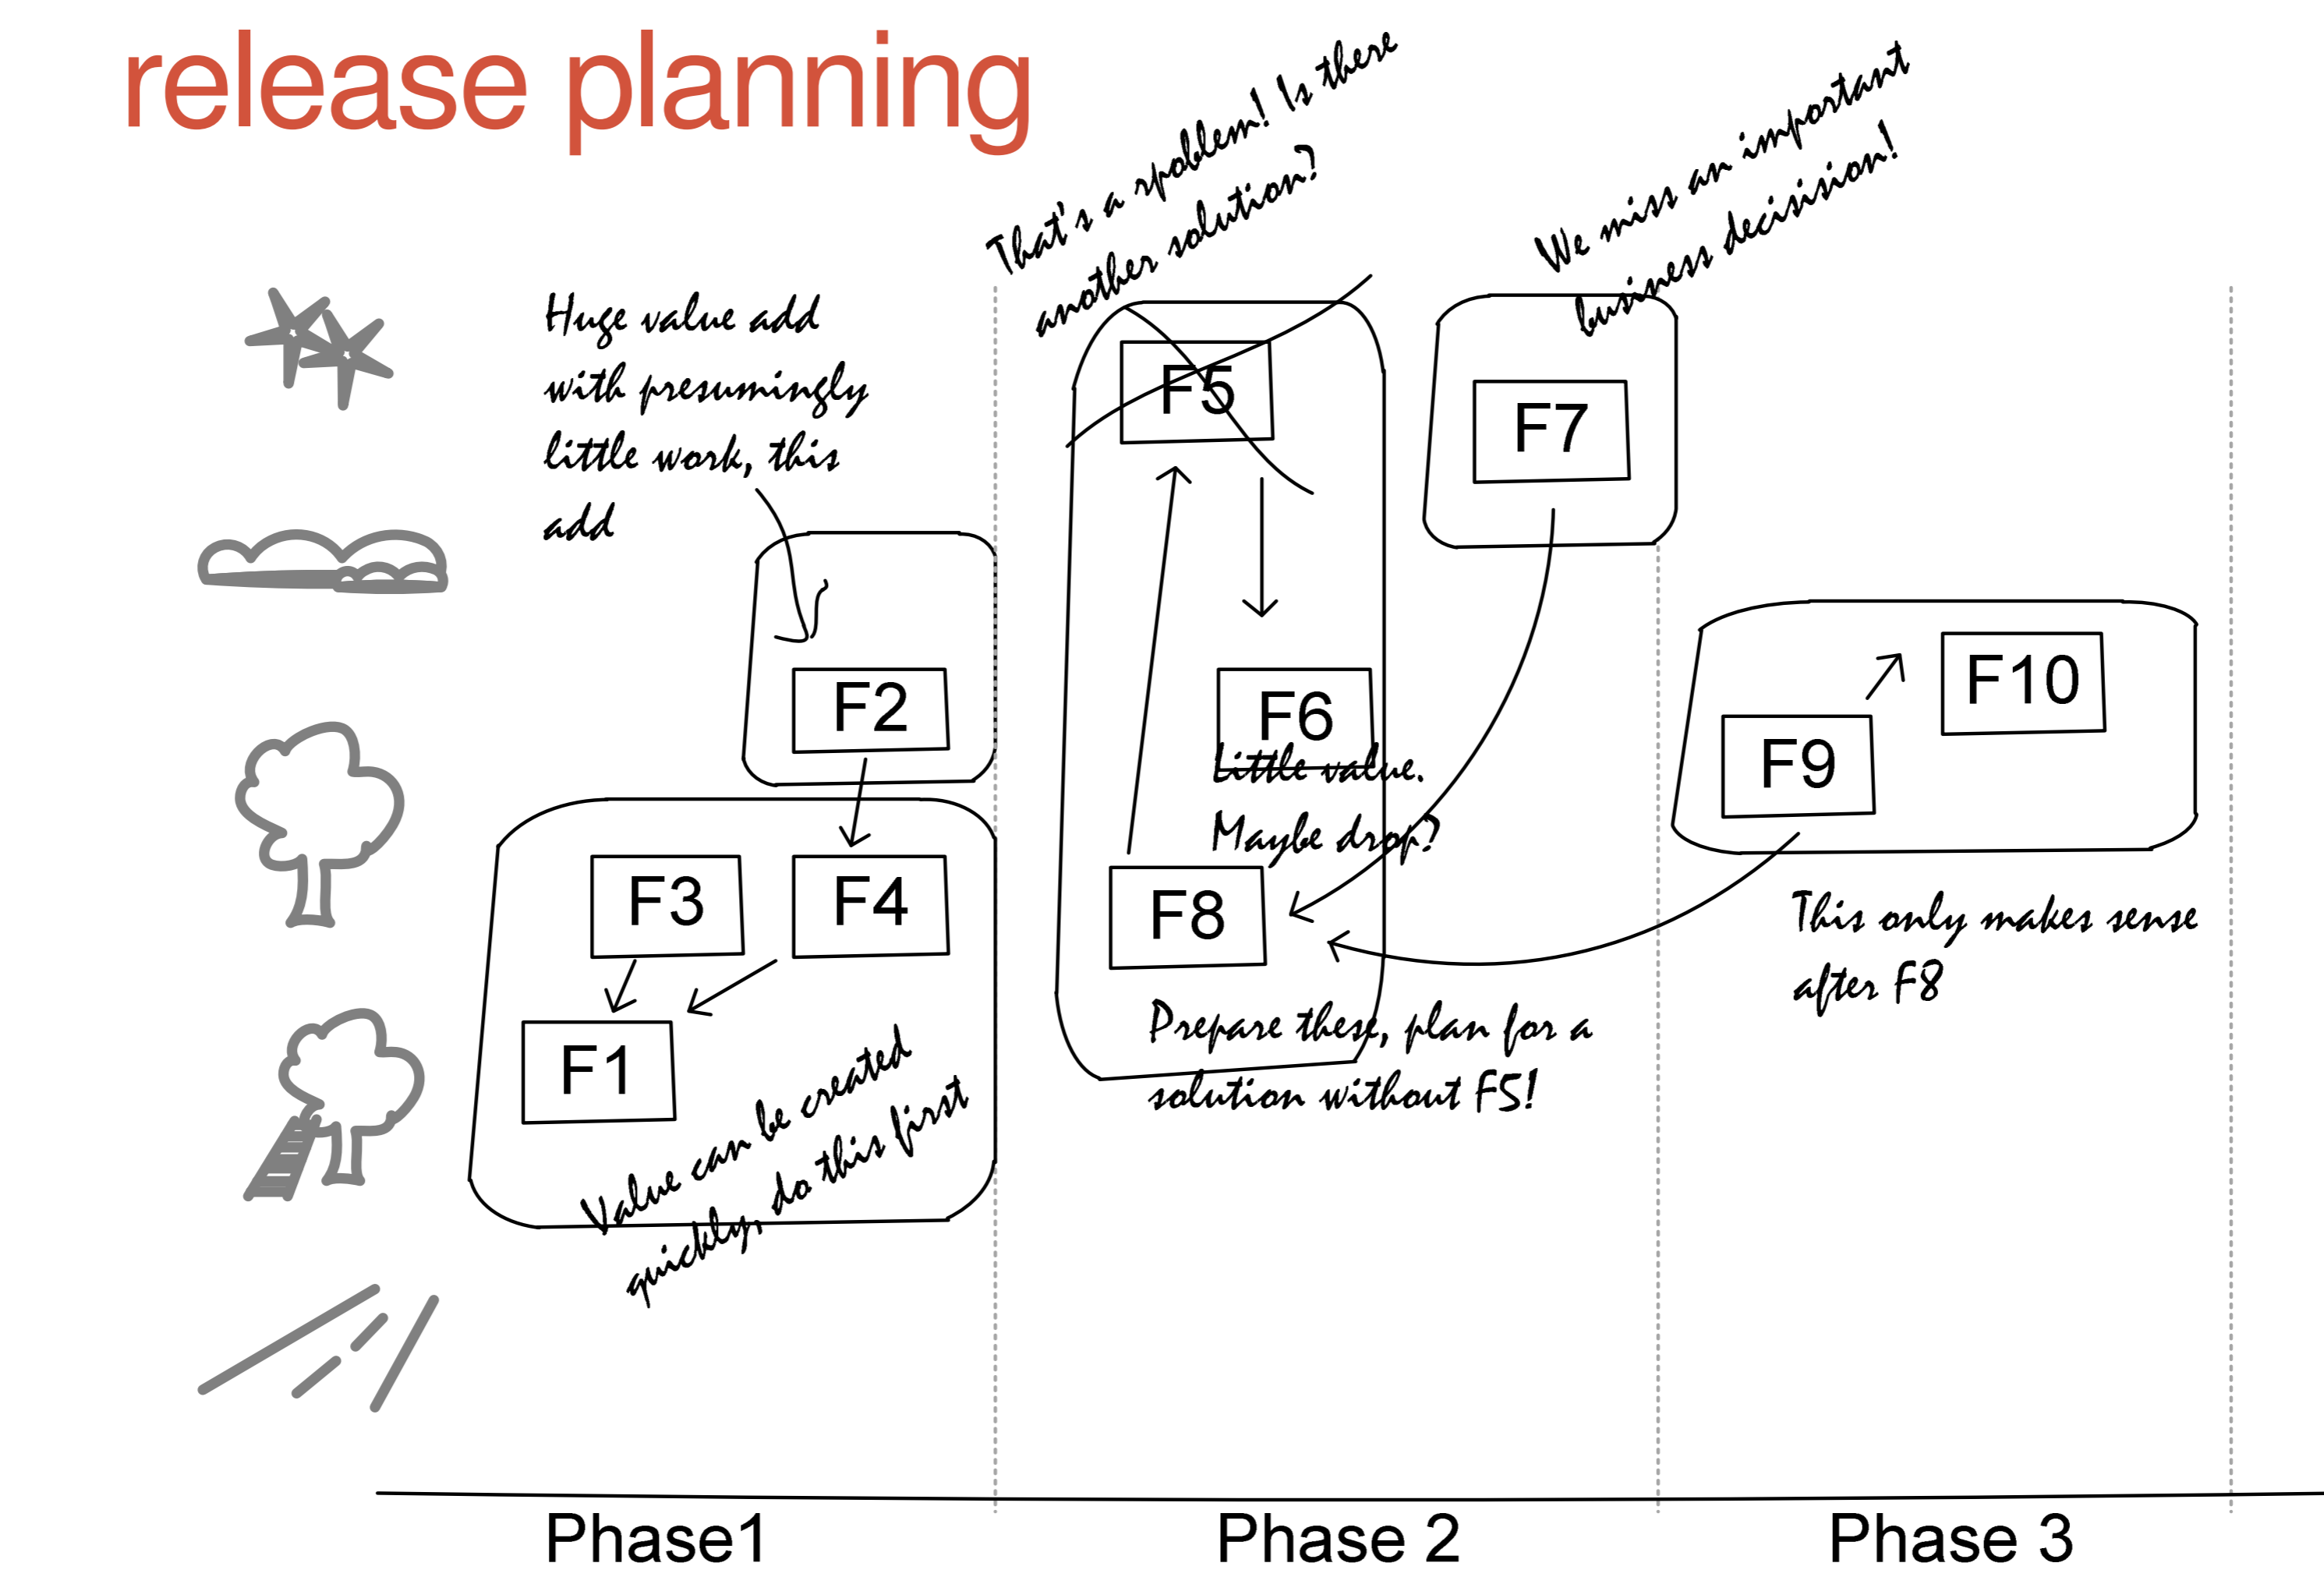

In some teams, a lot of discussion arise in sprint planning meetings:
The team finds it difficult to estimate backlog items with story points.

Divergent maturity

release planning

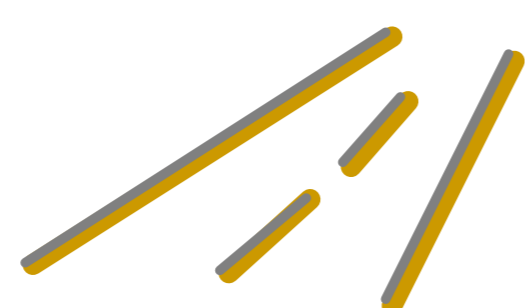

to explore

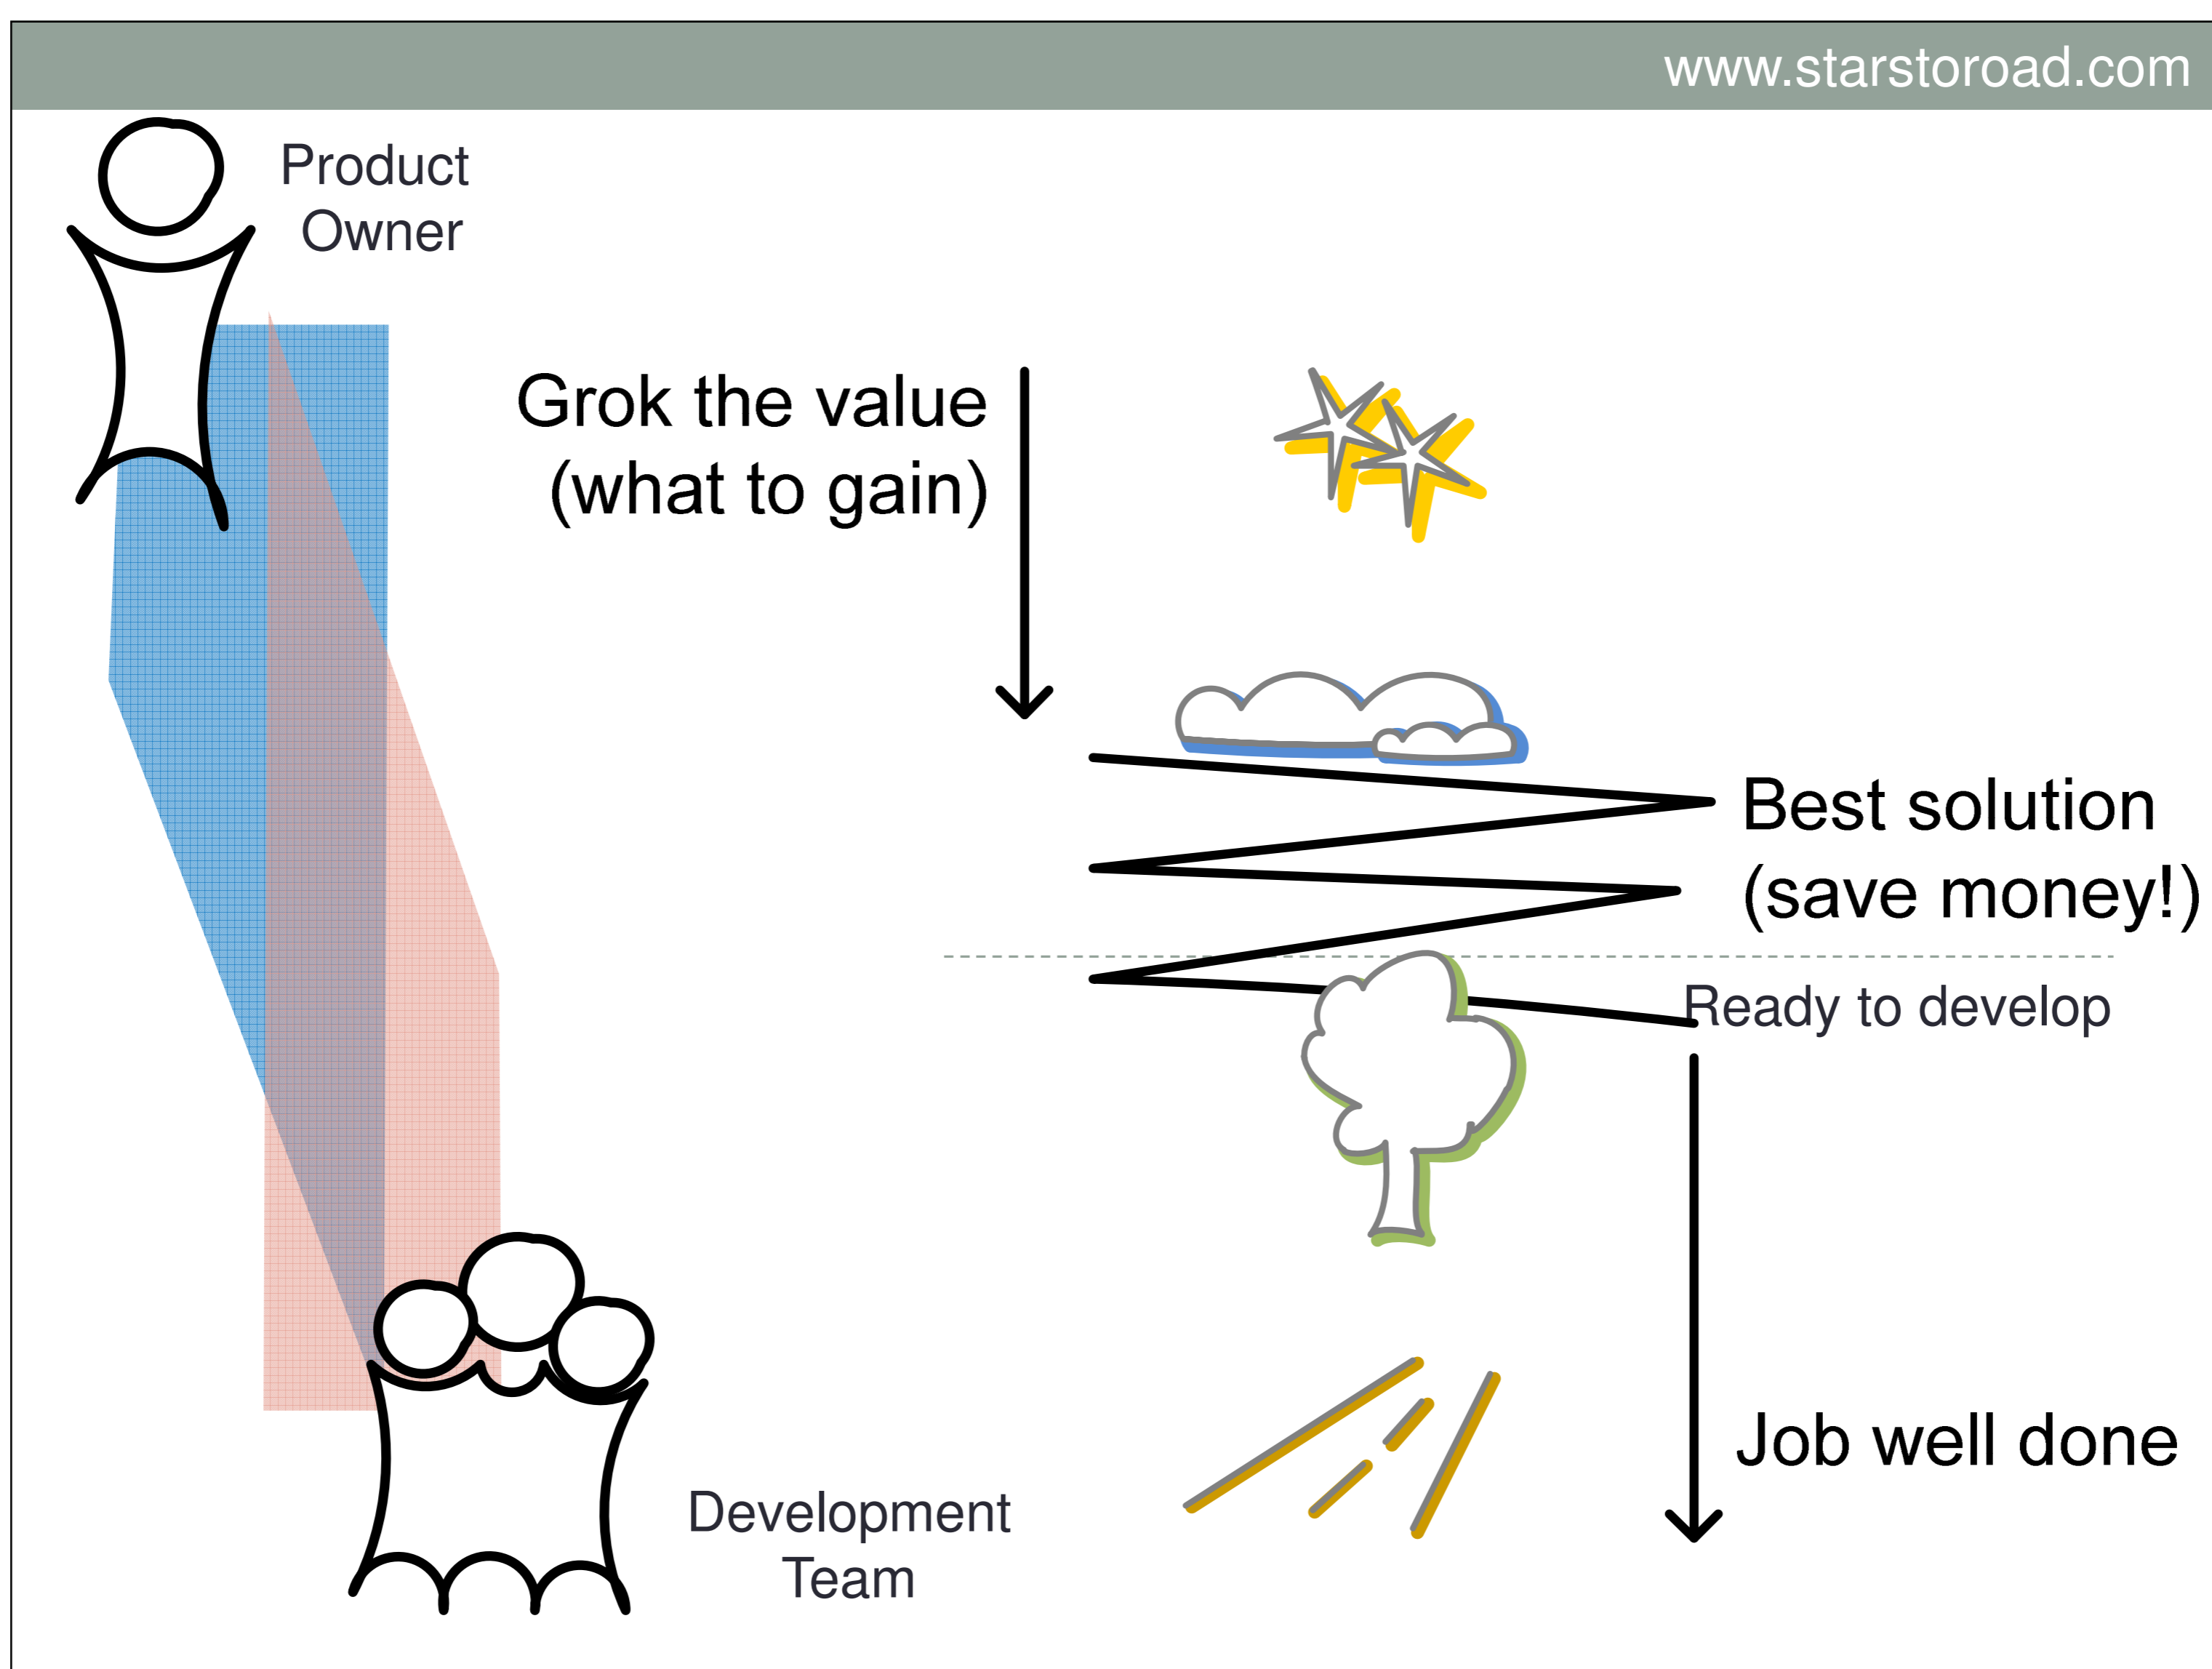

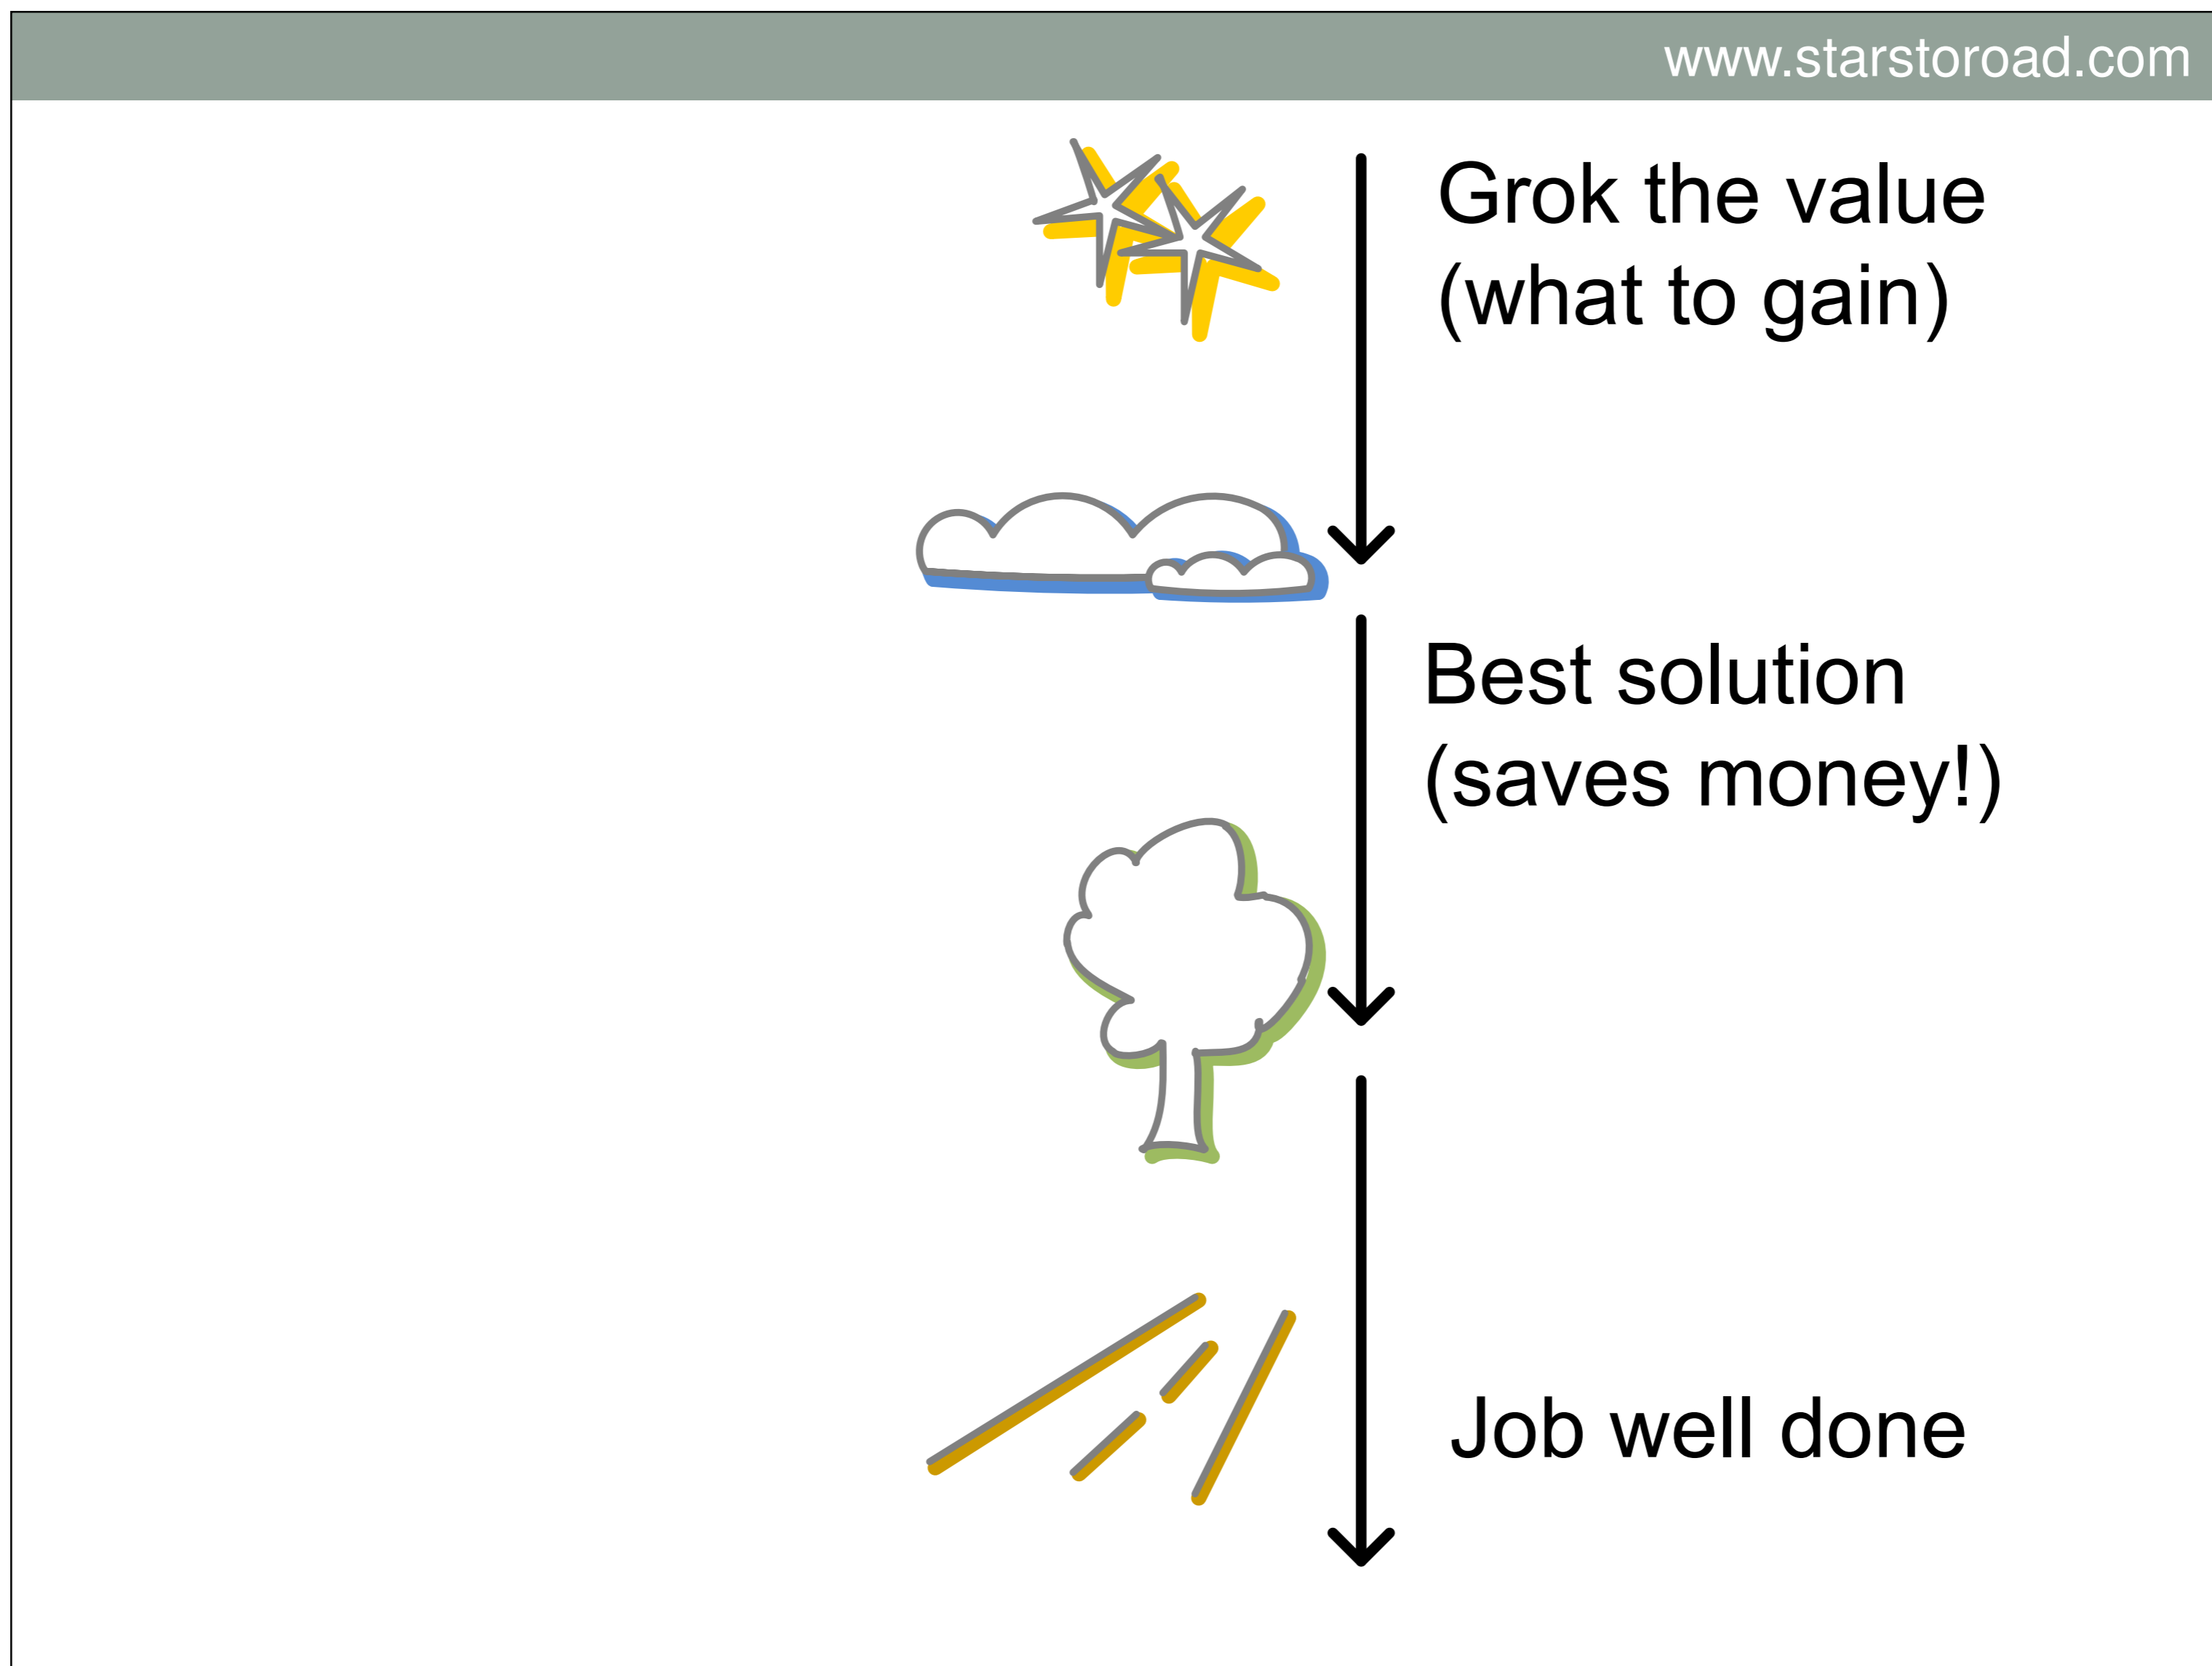

to build

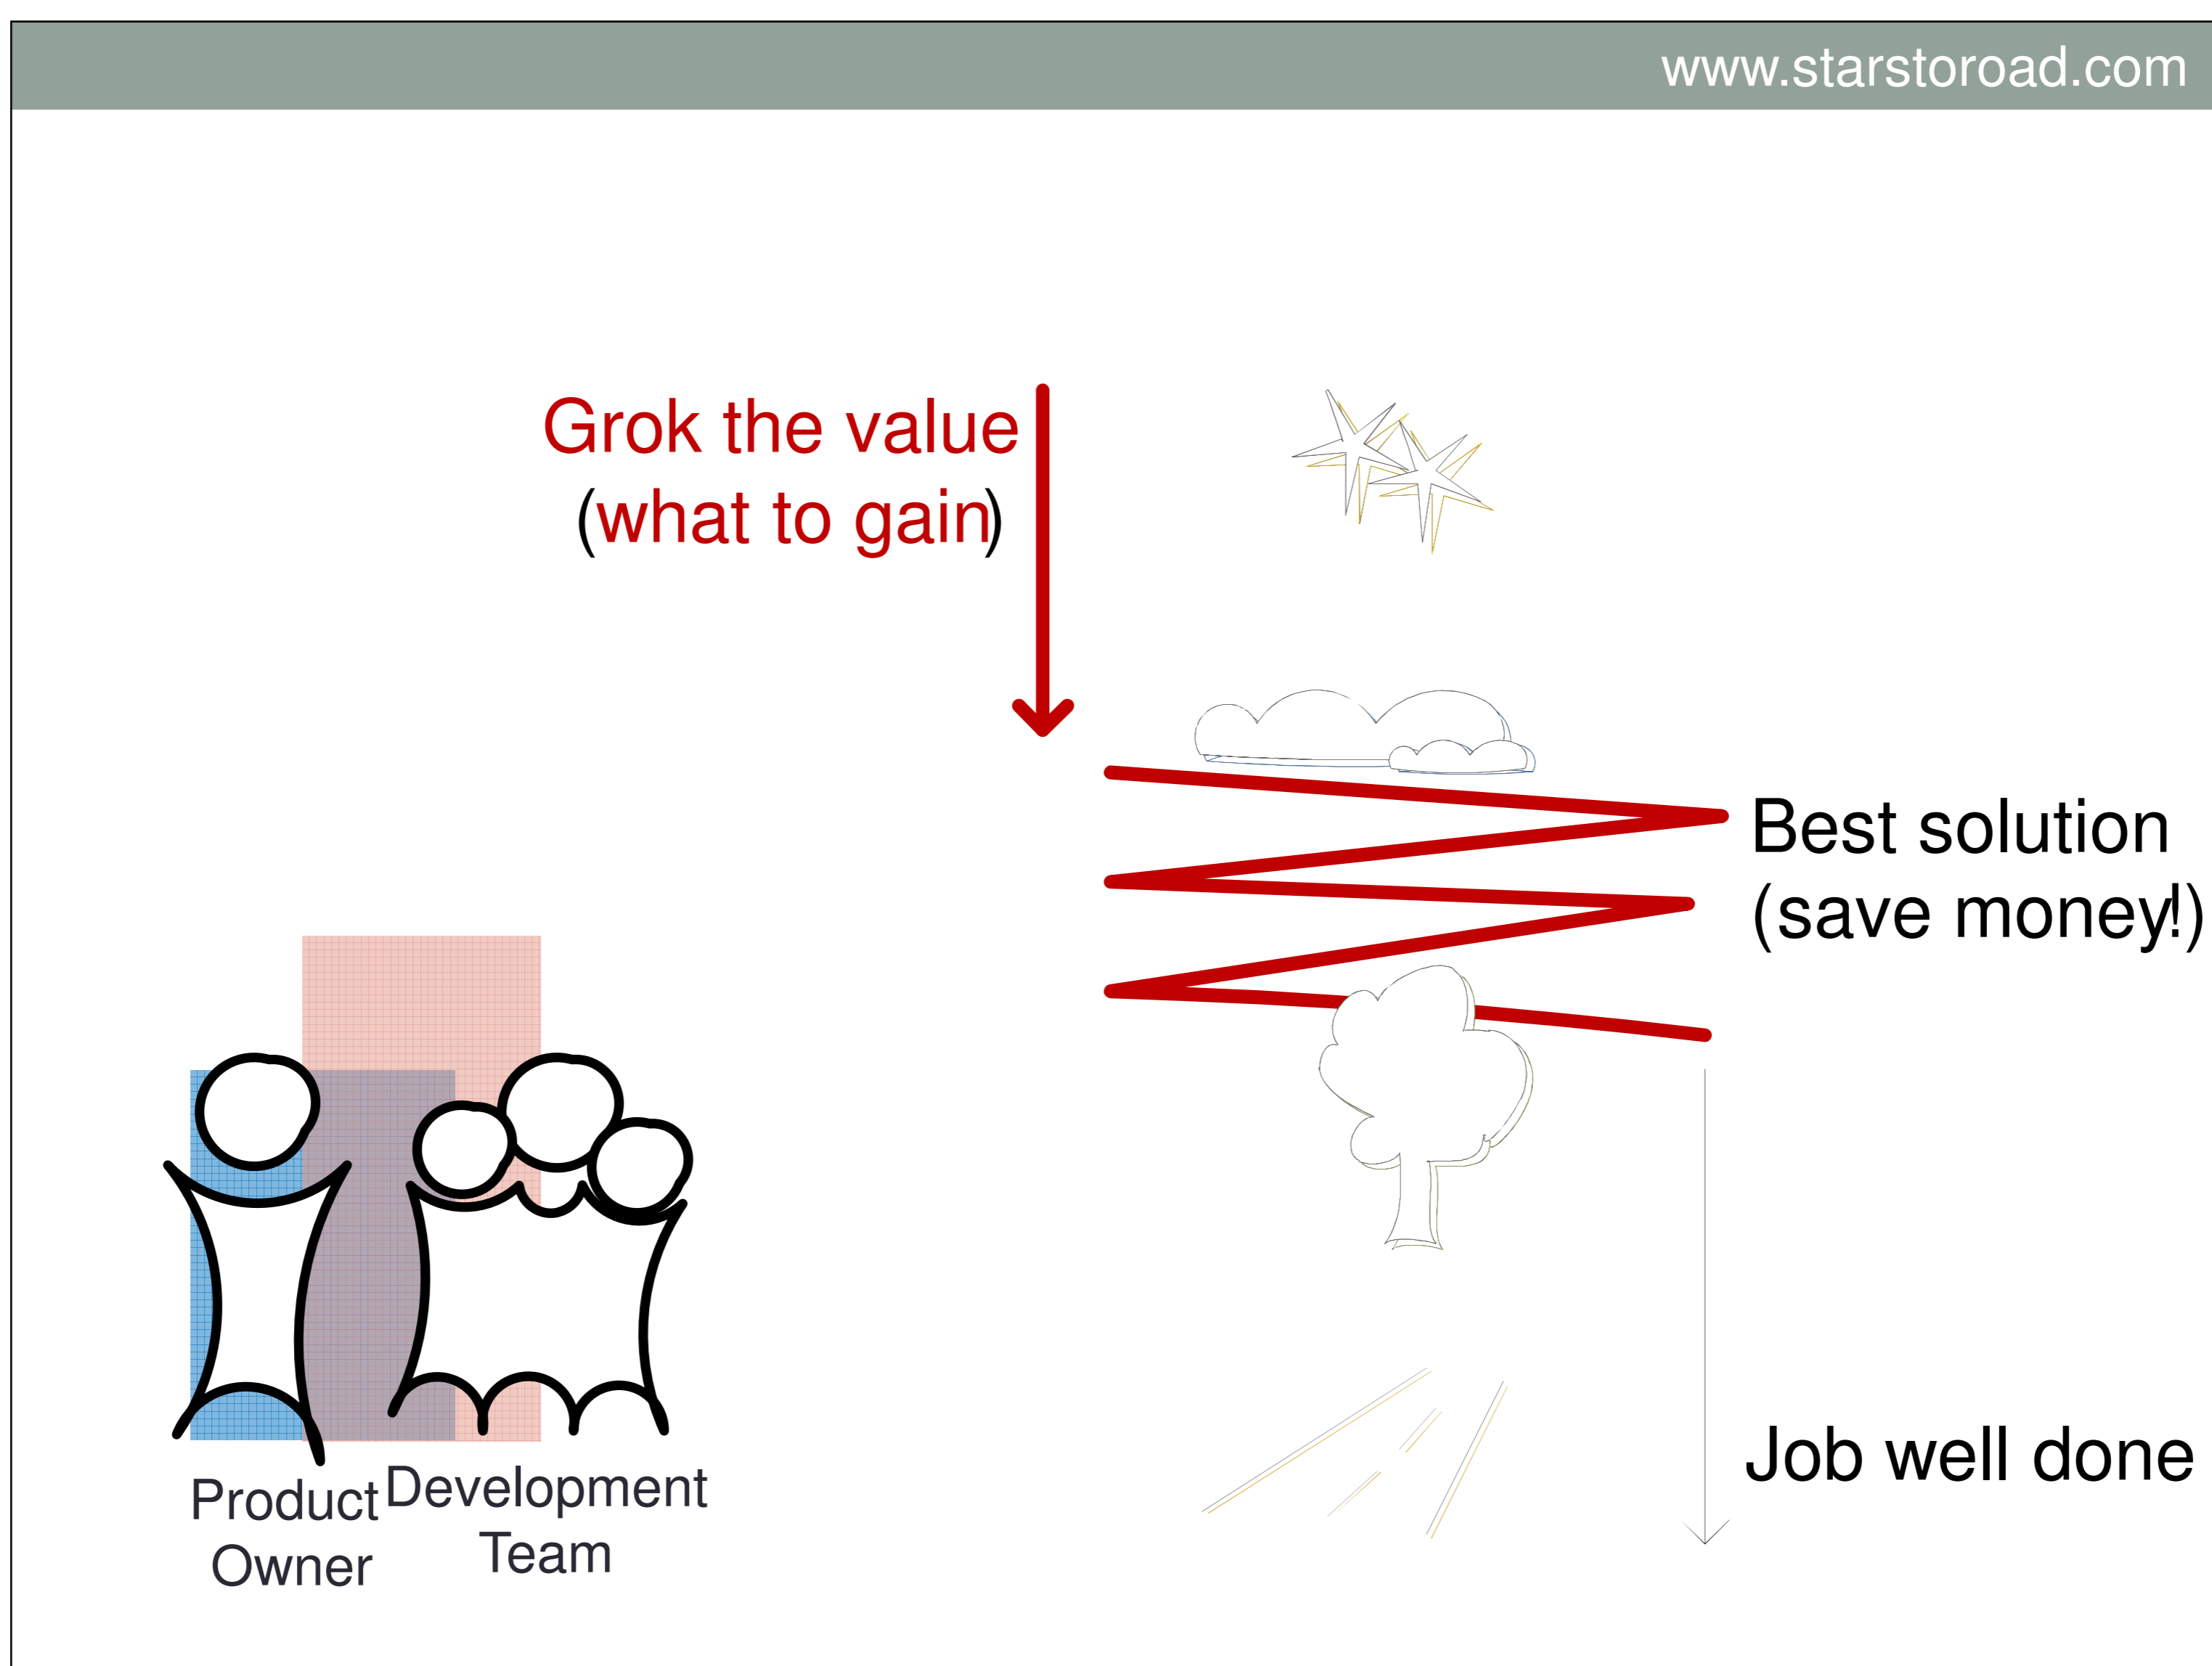

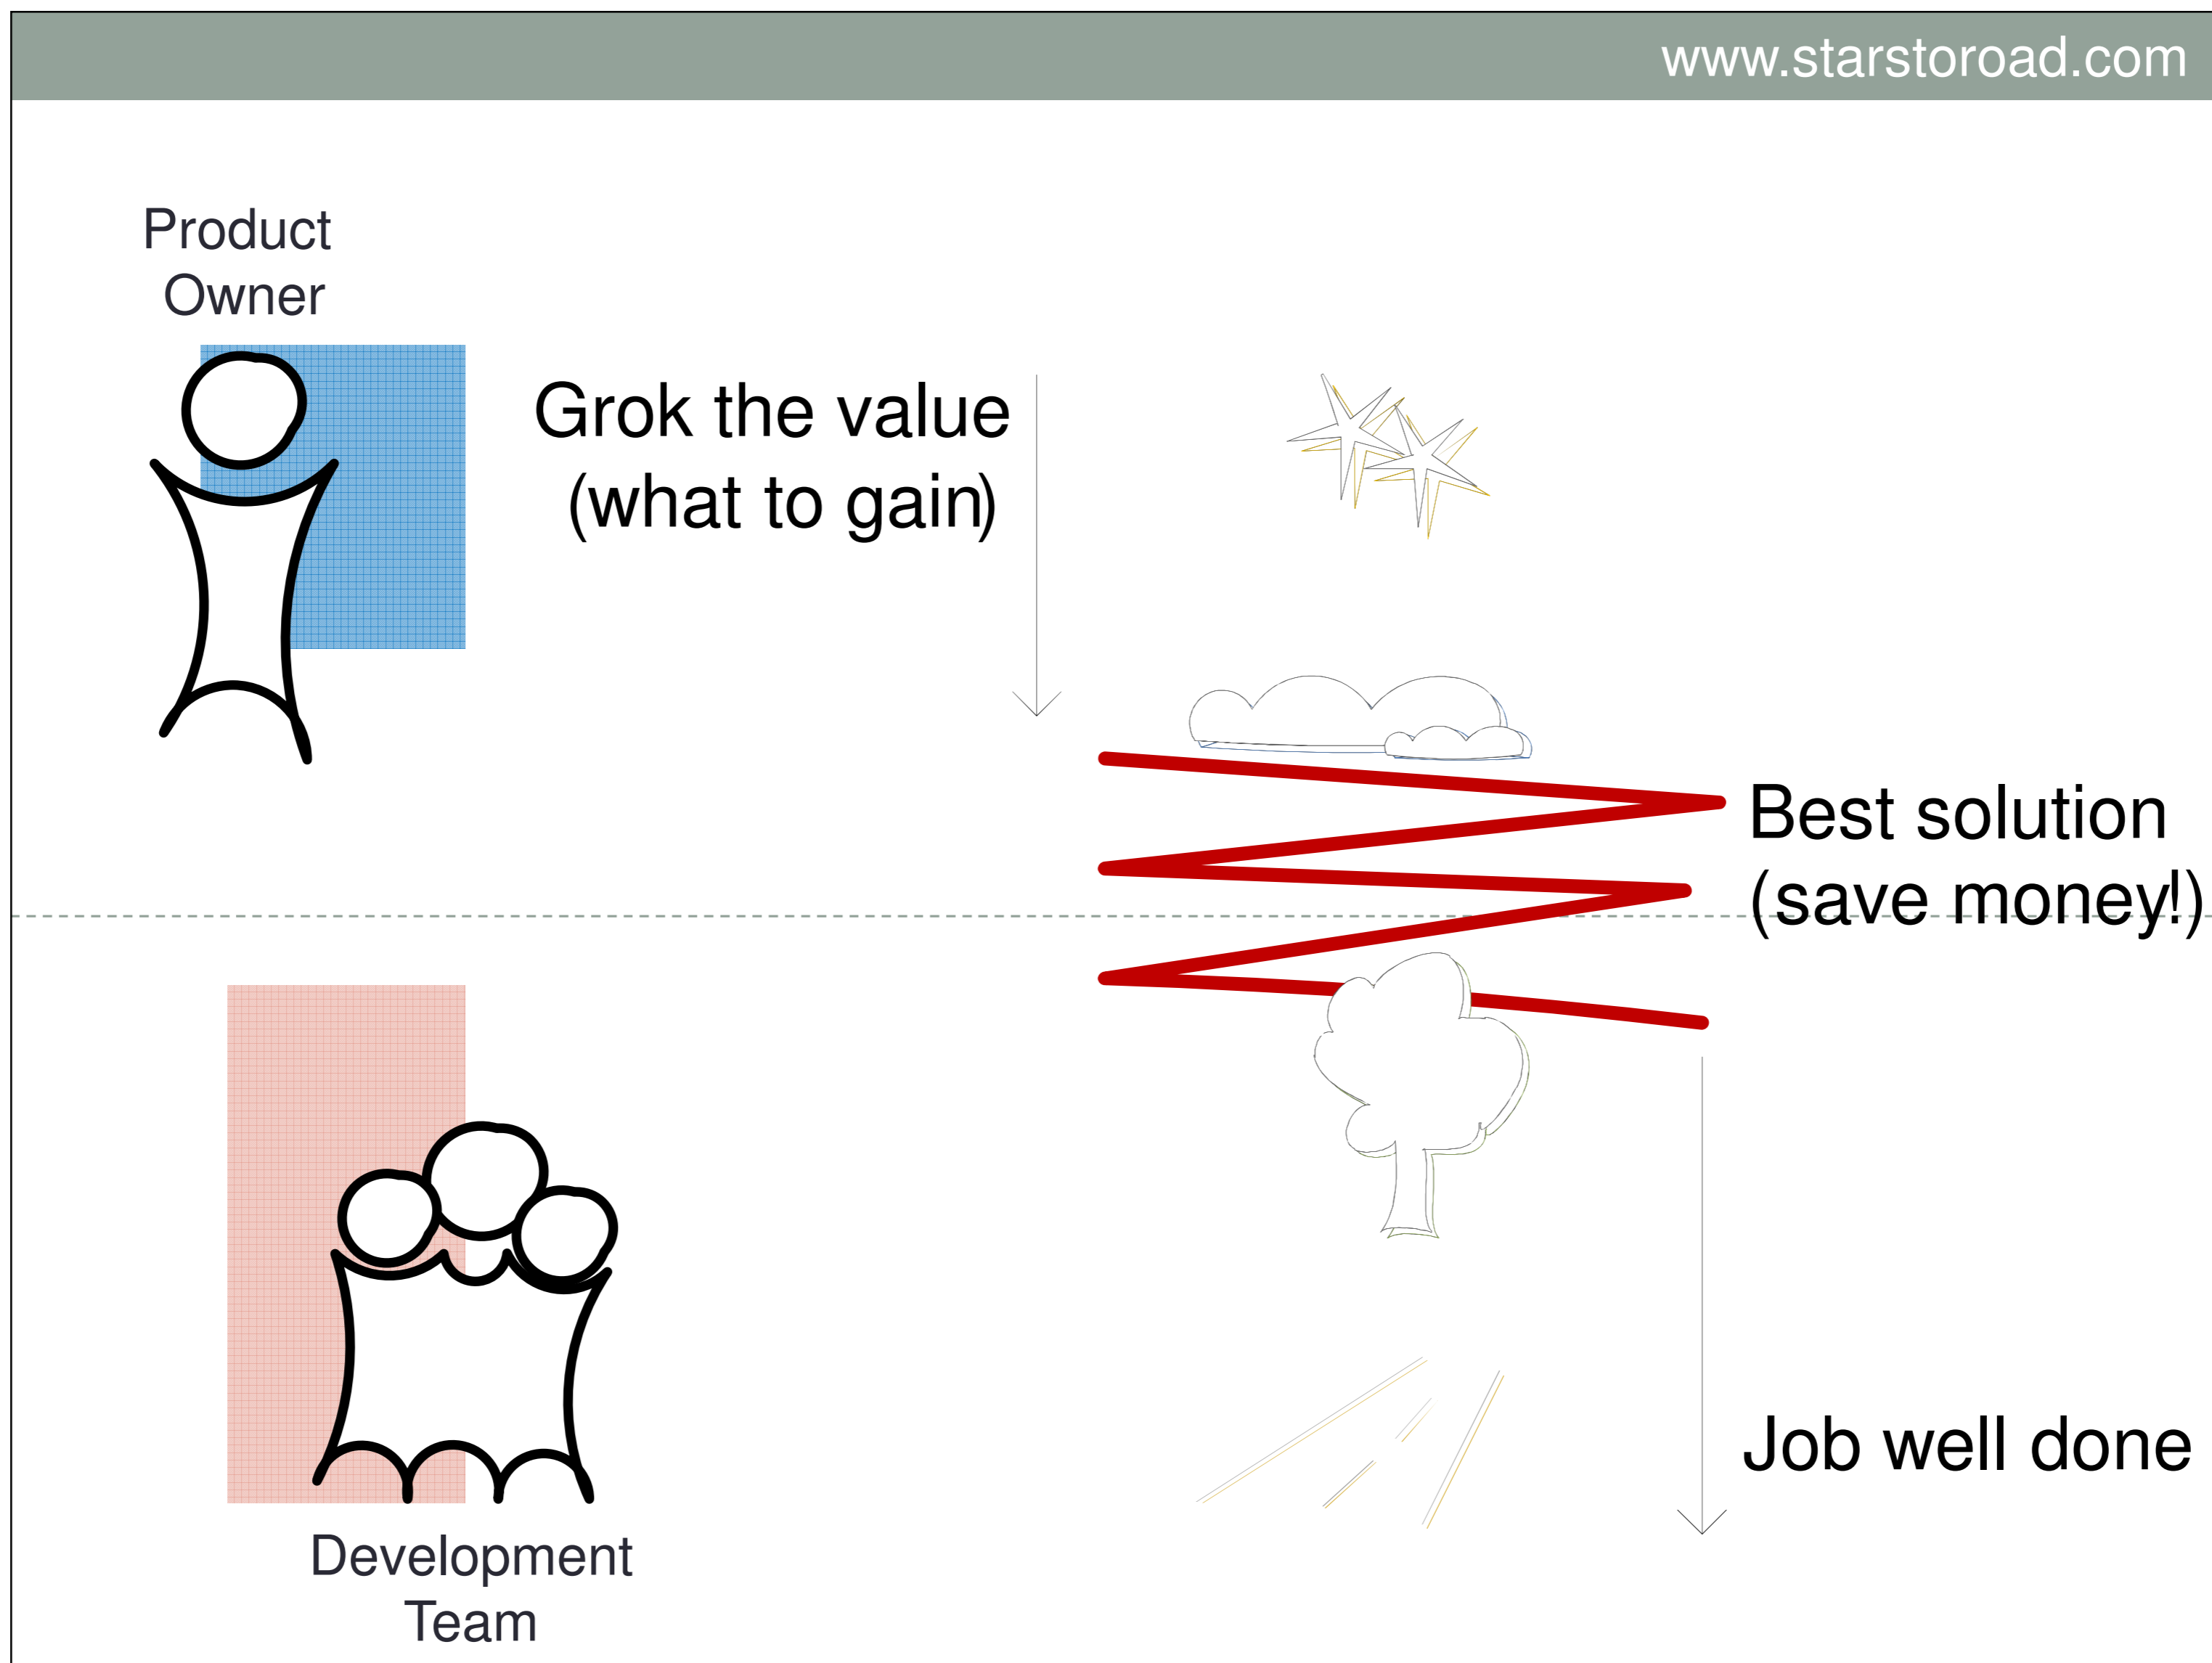

a refurbished back-log

1.		Size M		current iteration
2.		Size 8		
3.		Size 1		
4.		Size S		
5.		Size 13		
6.		Size L		
7.		Size XL		
8.		Size 8		out of scope
9.		Size L		

Does this make sense?

Stars to road

A simple concept of the maturity of an idea that fits agile approaches

Brings sanity into a project's backlogs

How well do you cover the space between clouds and trees?
